## CV 9040

**Mobile Bluetooth® hands-free car kit with DialogPlus voice control and touchscreen**

READY FOR  
CONVERSATION  
EVERYWHERE!

### Be everywhere at once

Adjustable and user friendly — the CV 9040 is the embodiment of these features. Everything that a mobile Bluetooth hands-free car kit needs is integrated into a flip case: Display, speaker, microphone and battery. Thanks to a diverse holder and the automatic picture rotation function, you can choose a position in the vehicle or wherever which corresponds to your needs.

### **Always join in the conversation**

### **Have everything within reach**

It is extremely comfortable and safe to operate. The CV 9040 has a speaker independent DialogPlus speech control, which is characterised by unique word recognition precision and speed. It doesn't matter how complicated a name in the telephone book is, or how fast you say the phone number, this agile device will react immediately to your voice.

The text to speech function is a further comfort. The hands-free car kit will read a text message aloud (for example) and supports you with acoustic signals when operating. However the CV 9040 not only listens to your voice, it can also be operated by touchscreen.

But you don't always have to say something first: thanks to integrated sensors the display picture automatically rotates if you want to attach the device the other way around for example. The day and night views also set themselves automatically. An automatic call answering service can also be set up. The CV 9040 is a guarantee for comfortable, mobile and safe hands free talking.

### **Installation types: sun shield, dashboard, middle console area, windscreen**

- Mobile: display, speaker, microphone and battery integrated in folding case
- A choice of different installation types: on the front windscreen, on the sun visor, on the dashboard or in the middle console area
- DialogPlus voice control – extremely accurate, rapid reaction word recognition without voice training and with visual and acoustic user support
- Intuitive touchscreen interface
- Text-to-speech – reads text messages out loud\*
- Voice dialling
- Multiple call handling – swap and hold calls, conference with up to 7 participants\*
- Automatic call answering available
- Display of telephone book, call lists, reception, telephone and provider names\*
- Can store multiple numbers for one contact
- Maximum capacity: 10 handsets, 1000 text messages, 150 voice tags, 15,000 contacts
- Light sensor automatically switches between day and night mode, with a choice of colour schemes available for each
- Position sensor: view automatically rotates 180°
- Automatic radio muting when on the telephone by using the active mount (Optional)
- Use as desk hands-free car kit possible

*\*The scope of the functions may vary according to mobile phone, network provider and software version.*
